

Microbial research for establishing a symbiotic system by wild animals resource recycling and effective utilization

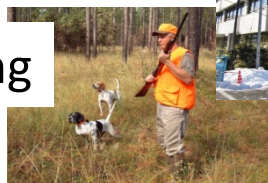

Relationship between Komoro city and Azabu Univ.

① Explosive increase of deer impacts on the environment

Adaptive management

② Culling

④ Slaughter

③ Population survey

⑥ Employment and training of cullers

Komoro City

Support

Support

⑤ Pet food manufacturing

Branding

Microbial research for high added value & high unit price of pet food

e. g. Evaluation of safety, utility for elimination diets, effects on bacterial flora

Microbial research for new product development
e.g. Lactic acid fermentation
